Numb. 4130

# The London Gazette.

Published by Authority.

From Thursday June 7. to Monday June 11. 1705.

*Lisbon, June* 8. *N. S.*

SEveral Men of War are lately arrived here from Ireland, with divers Transport-ships under their Convoy, having on board Horses and Recruits, which are landed and marched to the Army. A Fleet of about 400 Merchant-men, under Convoy of 6 Men of War, is fallen down our River, in order to sail for England with the first fair Wind. Letters from the Camp at Albuquerque of the 2d Instant give an Account, That after the taking of that Place, a Council of War was held, wherein it was resolved to march towards Badajos. The Marshal de Tesse, who lay on that side with the French and Spanish Army, has reinforced that Garison. They write from Gibraltar of the 23d past, That the Enemy having some Forces posted at a place called the Sand-Hills, from whence they could fire upon our Men who were employed in levelling the Works the Enemy had raised during the Siege; Colonel Revet was sent out the 13th with a Detachment of Granadiers to attack them; but the Enemy, upon his Approach, retired without making any Oppolition; and our Men have since entirely demolished those Works.

*Vienna, June* 3. The Emperor has appointed the Prince of Salm to be President of his Council, and First Minister of State; Baron Zeilern to be Chancellor of Austria; and Count Philip of Zinzendorf to be Chancellor of the Court: And it is said, he intends to make further Alterations in the Ministry. Prince Joseph of Lorrain is lately gone to Italy, to make the Campaign under Prince Eugene: The Reinforcements and Recruits designed thither continue their March by the way of Tirol. There is a Report, That a Body of the Malecontents in Hungary came unexpectedly before Buda, plundered one of the Suburbs of that Town, and carried away Prisoners divers of the Inhabitants, and several Men whom they found at work in the neighbouring Vineyards: That another Body of them came into the Neighbourhood of Pest, and drove away some Cattle, but were pursued, and the Booty recovered, by a Detachment of that Garison; And that they are drawing together a considerable number of Men near the River Morava, with intent to make an Excursion towards the Borders of Austria; but the River is at present so much swelled, that they will find find it a very difficult matter to pass it. The Bagage of General Herbeville, who commands in Chief the Imperial Forces in Hungary, which continue in the Island of Schutt, was sent down thither yesterday by Water; as was also a considerable quantity of Ammunition, which had been taken out of our Arsenal: And it is said, that a strong Reinforcement of Horse and Foot is shortly to march thither. It is reported, that 6 new Regiments will be raised very speedily.

*Basle, June* 7. We have an Account from Turin, That a Party of Hussars, which had been sent out to make an Excursion towards Crescentino, met near that Place 4 Troops of Dragoons, computed at 180 Men, all new Cloathed, who were marching thither from the Valley of Aousta, whom they attacked, killed 40 of them, and brought the rest Prisoners to Turin.

*Dresden, June* 10. The King of Poland is still at Carelsbad, but intends to be on the 20th Instant at Gorlitz, where his Forces in this Electorate have their Rendezvous. A Minister of the Czar of Muscovy is come to Carelsbad to conter with his Majesty. He left the Czar at Witepski in Lithuania, making Preparations for the Siege of Riga. A Detachment of his Army was marching towards the Province of Massovia, to join the Saxons and other Troops that are posted on the other side of the River Weissel.

*Francfort, June* 10. Prince Lewis went yesterday from Rastad, to join his Forces which are marching towards the Mosselle. The Pontoons of a new Invention, which were lately made here, were sent away yesterday towards the Mosselle; and a greater Number is ordered to be got ready with all possible Expedition.

*Coblentz, June* 11. The Forces of the Circle of Westphalia, which lay near this Place, began their March the 10th Instant towards the Mosselle. This day two Regiments of the Forces of Munster, and the Forces which are furnished by the City of Cologne, as their Quota, arrived here in their way thither: The Regiment of Horse of the Prince Royal of Prussia, the Dragoons of Witgenstein, and that of Foot of Lotrum, advanced this day 4 Leagues above this Place, marching likewise to the Mosselle.

*From the Duke of* Marlborough's *Camp at* Elst, *June* 13. The Army commanded by his Grace the Duke of Marlborough continues still in this Camp, expecting the arrival of the Troops from the Imperial Army, and those of Prussia; the former are supposed to be advanced this day as far as Birkenfelt, and part of the latter are on this side Mentz. Baron Flemming, General of the King of Poland's Forces, came hither on Wednesday last from the Waters at Embs to wait on his Grace: And the same day the Count de Martigni, Grand Veneur to the Duke of Lorrain, brought Letters from his Master, recommending his Country and Interests to his Grace's Protection. Monneur Geldermalsen, Deputy of the Council of State in Holland, arrived here this day from thence, being to continue with the Army during the Campaign. On the 8th Instant a Party of our Hussars brought into the Camp 27 Horses, which they had taken from the Enemy in the Road between our Camp and Thionville. Another of our Parties of 60 Foot and 30 Hussars, that went out last night towards Luxembourg, returned this day with a Booty of 150 Horses, which they took within a League of that Place from Wagons that were bringing Bread to the Enemy's Camp. The Situation of this Camp gives us a good Opportunity of besieging Saar Louis. The Marshal de Villars continues in the same Camp, very strongly intrenched: The Desertion among his Troops is so great, that he has judged it necessary to post Guards round his Camp to prevent it, which does not however hinder great Numbers of his Men from coming over to us daily.

*Hague, June* 16. The Enemy's Forces before the Castle of Huy having made Preparations for a general Assault, and the Breaches being so wide, that the defending of the Place any longer was judged impossible, the Governor beat a Parley the 10th Instant about 9 at night, but could obtain no other Conditions than that the Garison should march out of the Breach with their Arms, and should afterwards lay them down, and surrender themselves Prisoners of War; which was put in Execution the next day at noon. The 12th, that part of the Garison which was in the Forts St. Joseph and La Saar marched out in like manner, and they were all carried to Namure. The Enemy have not since made any Motion; but they give out, that their Design is to attack Liege. Several Letters from Madrid came by the former Post giving an Account of a great Insurrection in Catalonia, wherein not only the ordinary sort of People, but even the principal Inhabitants, were concerned; and that upon Advice thereof, Orders were sent to the Governor of Cadiz to disband two Regiments of Dragoons, composed of Natives of that Province, who were in that Garison, and to imprison their Officers, which he had accordingly done. These Advices are confirmed by the Letters which came in this day; And they add, That the Marshal de Tesse, upon Advice that our Forces had taken Albuquerque, had laid aside his Design of attacking the seperate Army of Portuguese commanded by the Marquis das Minas, and retired towards Badajos, in order to provide for the Security of that Place, expecting that our Forces would besiege it. The Pope's Inter-Nuncio, who resides at Brussels, is lately come hither, to compose the Differences between the Roman Catholicks in this Country, concerning the Bishop of Sebaste and a Priest named Code, who both pretend to an Authority over them, as Vicar-General, one being appointed by the Pope, and the other by the States General; upon which Subject the Inter-Nuncio had two days ago a Conference with the Deputies of the City of Amsterdam, in the Assembly of the States of Holland and Westfriesland, who are at present in Town. Our Fleet of Merchant-men, consisting of about 300 Sail, bound to the Baltick, sailed lately, under Convoy of 11 Men of War.

*Plimouth, June* 5. Yesterday came in here a Danish Ship bound for Lisbon: The same day sailed 3 Dutch Men of War, 3 Dutch Privateers, and about 16 Sail of homeward-bound Ships and Prizes under their Convoy. This day came in the Ann, laden with Masts for the Dock; the Zealand Privateer of Middlebourg from cruising; the Barnstad Galley of London, George Morris Master, from Legborne; and the Friend-
